ONLINE SHOPPING SYSTEM

Problem Statement:

The online shopping system allows the users and vendors to exchange products remotely and reduces the amount of cost and time substantially.

Software Requirements:

The software provides the following facilities to the customers:
• Facilitates easy shopping online anywhere with free shipping (conditions apply).
• Provides information about the products in categories
• Can avail the facility of purchasing second hand products
• Can reserve if the particular product is not available
• Customers are provided with up to date information on the products available
• Provides email facility for future correspondence
• Provides backup facility
• Can add nearly ten products to their shopping cart at a time

The software will not provide the following facilities to the customers:
• Cannot reserve the product for more than two days.
• Cannot reserve more than two products
• Responsibility of damages
• The product cannot be changeable once confirmed

The software provides the following facilities to the merchants:
• Facilitates easy bidding facility
• Provides complete information about the customers
• Provides complete information about their products
• Can avail the facility of email correspondence
• Can avail the brand catalog facility
